Summary

Full-Stack Developer with hands-on production experience in **React.js, Next.js, Node.js, Nestjs, TypeScript, PostgreSQL** and **MongoDB**. Delivered live features as an intern at a fast-moving startup, from job-board filtering to payment workflows, and now build an independent full-stack product end-to-end, including a real-time SaaS platform and applied deep-learning applications.

Comfortable owning a feature from database schema to deploy UI, and quick to pick up new tools and codebases.

Technical Skills

- **Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux Toolkit, Context API, Zustand, TanStack Query, React Hook Form, Styled Component
- **Backend:** Node.js, Python, FastAPI, RESTful APIs, WebSocket, MySQL, MongoDB, PostgreSQL, Prisma, Redis, JWT Authentication, OAuth, RBAC
- **Applied AI:** TensorFlow/Keras, CNNs, transfer-learning, Model development via fastAPI
- **Testing & Quality:** Jest (Unit Testing)
- **UI/UX & Styling:** Shadcn UI, Bootstrap, Material-UI, Responsive Design, Component Libraries
- **Cloud & Deployment:** CI/CD (GitHub Actions), Postmark, Vercel, Git, npm, Resend, CI-friendly workflows.

Professional Experience

MERN Stack Developer Intern — LoubbyAI

May 2025 – Dec 2025

- Developed and improved full-stack product features using React/Next.js, Node.js/Express and MongoDB in a production engineering environment.
- Contributed to job-board filtering, resume builder/download workflows, timesheet functionality and payment-related product features.
- Worked on frontend and application performance improvements, debugging, API integration and iterative feature delivery.
- Collaborated with the engineering team through regular stand-ups, implementation reviews and ongoing product development.
- Contributed to **Autonoms AI**, an AI-agent marketplace, developing buyer/seller workflows including requests, proposals, consultations and marketplace interactions.
- Worked on payment-related workflows, API integrations, real-time functionality and product analytics.

Full-Stack Projects

UltraLink Live — Real-Time Tele-Ultrasound Collaboration Platform

Next.js, TypeScript, NestJS, PostgreSQL, Prisma, LiveKit, WebSockets

- Developing a real-time healthcare collaboration platform connecting ultrasound operators with remote experts for live consultation and examination guidance.
- Built role-based workflows for **Owners, Managers, Experts and Operators**, including workspace invitations, clinical cases, expert assignment and consultation scheduling.

- Implemented real-time communication and session infrastructure using **LiveKit**, **WebSockets/Socket.IO** and **NestJS**.
- Developed a **Next.js/TypeScript** frontend and **NestJS/PostgreSQL/Prisma** backend with JWT authentication and workspace-based access control.
- Designed consultation, notification and pay-per-consultation workflows for diagnostic centers.

Pneumonia Detection Web App — CNN + Explainability Interface

Python, TensorFlow/Keras, VGG16, FastAPI, Next.js, TypeScript, Grad-CAM | 2025–2026

- Built a transfer-learning image classifier using **VGG16** and **TensorFlow/Keras**, achieving **93.1% test accuracy** and **0.978 ROC AUC**.
- Developed a **FastAPI inference API** for processing chest radiographs and returning model predictions and confidence scores.
- Implemented **Grad-CAM explainability** to visualize image regions contributing to pneumonia predictions.
- Built a **Next.js/TypeScript** interface for image upload, predictions and interactive explainability overlays.

Potato Disease Classifier — Full-Stack ML Application

Python, TensorFlow/Keras, FastAPI, Next.js, TypeScript | 2026

- Built an image-classification model using **TensorFlow/Keras** for identifying potato leaf diseases from uploaded images.
- Developed a **FastAPI backend** to serve model inference through a REST API.
- Built a **Next.js frontend** for image upload, prediction results and model confidence display.
- Integrated the ML model, backend API and frontend into an end-to-end full-stack machine-learning application.

Education

B. Rad. Medical Radiography, Nigeria

Aug 2021 – Sep 2026

Completed the final year of the degree in a hybrid arrangement, balancing a full-time industry role with academic requirements.

Languages

- **English:** Professional Working Proficiency (Technical Documentation, Team Collaboration, Client Communication)
- **Yoruba:** Native / Bilingual Proficiency
